**Sub: CREP- COMPLIANCE REPORT**  
Ref: Your letter no. L-1895 dt. 23.09.10

Dear Sir,  
Enclosed please find herewith the compliance report of CREP for the year 2021-22.

Thanking you.

Yours faithfully

  
09.06.2022

(A.K Das)  
CGM (MM,CED&ENV)

<b>From:</b> Sri. V Agarwal, Chief General Manager I/C (PP) Bokaro Power Supply Co. (P) Ltd. B. S. City	<b>To:</b> The Member Secretary, Jharkhand State Pollution Control Board, T.A. Division Building (Ground Floor), H.E.C. Dhurwa, Ranchi - 834004
---	---

**CORPORATE RESPONSIBILITY FOR ENVIRONMENT PROTECTION  
(CREP) OF POWER PLANT/BOKARO POWER SUPPLY CO. (P) LTD.**

CREP ACTION POINTS	STATUS OF COMPLIANCE
STACK EMISSION	a) All Boilers in Power Plant are provided with Electrostatic Precipitators (ESPs) to restrict Stack Emission. b) Stack Emission parameters related to all Boilers are maintained within the prescribed limit of 100 PPM for old Boilers and 50 PPM for New Boiler (Unit #9 only). c) Round the clock surveillance, Monitoring & maintenance of ESPs are done to maintain the prescribed norms. d) Installation of online Sox, NOx analyzer is already done in four boilers. Procurement of Sox, NOx analyzer for remaining four boilers along with commissioning of real time data transfer to JSPCB & CPCB is in pipeline. e) Online stack emission monitoring system has been installed and working successfully. Monitoring is being done by Yokogawa System and parameter is being display in CPCB & JSPCB.
SOLID WASTE / HAZARDOUS WASTE	a) Fly ash along with bottom ash is being sent to ash pond and presently used in road construction activities/back filling of low laying areas. b) Silos are in place for boiler 6,7,8 and 9 for collecting dry fly ash. c) 15 KL of Burnt industrial oil have been auctioned to recycler M/s Balajee Refining Industries in 2021 through e-auction by M/s MSTC. Another 40 KL of Burnt Transformer oil is in stock has been already auctioned and is awaiting to be lifted by the recycle agency. d) Metallic Scrap are being sent to BSL for re-use. e) Batteries are being disposed of to recycle through the buyback arrangement while procurement of new batteries. f) Used conveyer belts, motors, cables etc are e-auctioned through M/s MSTC to vendors for recycling. g) E -waste is in the process of being e-auctioned through M/s MSTC to vendors for recycling.

UTILIZATION OF DRY FLY  
ASH/POND ASH

a) Utilisation of Pond Ash for Road Construction

- We have signed MoU with NHAI for utilization of pond ash for their road construction activities in dhanbad division.
- In Last financial year approx.. 7053 cum of Ash has been utilized by NHAI, Dhanbad in NH#2 road construction

b) Utilisation of Pond Ash for low lying areas/embankment

- A quantity of 80,000 cum ash has been filled for construction of hazardous waste pit of BSL.
- Approx. 4,52,680 cum of ash has been used in filling up of low lying areas in and around our ash pond and plant premises.

c) **DRY ASH COLLECTION SYSTEM**

- The dry ash collection system exists and in working condition for CPP Boilers and unit # 9.
- We have been supplying fly ash from silo to M/s. Dalmia Cement as per their requirement.
- In last year 3078 MT of ash has been lifted by local brick manufacturers from our silos.
- Necessary arrangements are being done for utilization of bricks in the plant via circulars both in BPSCL and BSL stating, "only ash bricks is to be used for all construction activities.
- Dry fly ash is being used for in house production of fly ash bricks for internal use.
- One semi- automatic (capacity 8000 to 10000 per shift) and one Manual machine (capacity 2500 to 3000 per shift) have been commissioned for in-house brick manufacturing.
- Last year 25,462 bricks have been manufactured in house for internal consumption and for supply to BSL.
- Two nos of Fly Ash Bagging Machine have been commissioned for bagging of fly ash and transportation to end users by railway wagons.
- 330 mtr. long platform has been erected at railway siding to facilitate easy loading of ash bags into the wagons.
- Agreement has been signed with M/S Orient Exports Pvt. Ltd. for bagging and transportation of Ash by railway wagons. Bagging work is under progress. 10566 cum of Ash has been sent

H01  
21/4/22

09/06/2022

	<p>through rail mode to darshana, Bangladesh. A target of transportation of fly ash bags @ 01-02 rake per month has been kept.</p> <p>Detailed Utilization report year wise attached.</p>
<p>WATER CONSERVATION/WATER POLLUTION</p>	<p>a) Industrial water consumption is 6607cum/day, which is recycled and sent back to BSL network.</p> <p>b) Water sent along with ash slurry to ash pond which after after settlement of suspended solids is reused . A <i>water flow diagram is attached.</i></p> <p>c) <b>On-line Effluent Monitoring System</b> has been installed and working successfully. Real time data transmission is being done through NEVCO server to JSPCB &amp; CPCB. The parameters being monitored are PH, COD, BOD and TSS.</p> <p>d) <b>Zero liquid discharge system in outfall of BSL commonly used by BPSCL also is installed and no industrial effluent is discharged to outside water body.</b></p>
<p>RAIN WATER CONSERVATION/ HARVESTING MANAGEMENT</p>	<p>a) The existing power plant has a well-designed storm drainage system.</p> <p>b) Storm Water/ Rain water drains are connected to BSL network and discharges the same to cooling pond of Bokaro Steel Plant through Zero liquid discharge.</p> <p>c) The cooling pond also acts as the raw water reservoir</p> <p>d) The water collected in the cooling pond also recharges the ground water table.</p> <p>e) Installation of Rain Water Harvesting for individual buildings is under progress</p>
<p>CONSERVATION OF ENVIRONMENT</p>	<p>a) Trees were planted in and around the plant area during last year.</p> <p>b) 50 kg of grass seed (Estilo Hamata) planted in ash pond area for environment protection. Additionally, samplings of Kadam and bamboo trees are planted to develop the greenery. Regular plantation in and around peripheral areas will be carried out.</p> <p>c) Bio-stabilization of ash dumps with use of Jute geo textile, coconut coir logs, and vetiver grass are being carried out to develop green belt.</p> <p>d) Power Plant is committed to maintain an eco friendly environment. We have developed the eco-friendly garden in plant. It is a continuous process and plant is adhering to this principle.</p>
<p>GREEN PROJECT MISSION</p>	<p>a) BPSCL has installed 100 KW of solar Power on the roof-top of its office buildings for clean energy production.</p> <p>b) BPSCL has also installed 02 MW of solar Power project on rooftops of different BSL buildings like Administrative building, Bokaro general hospital etc.</p>

1/06/2022

<p>DRY FLY ASH MISSION</p>	<p>a) A conference for Fly Ash Utilization and disposal has been organized by BPSCL at Bokaro Steel City.</p> <p>b) In consultation with BSL Environment Deptt., we are carrying out different programs for awareness of utilization of dry fly ash. Advertisement by Poster News paper and local TV channels are done.</p> <p>c) One semi- automatic (capacity 8000 to 10000 per shift) and one Manual machine (capacity 2500 to 3000 per shift) have been commissioned for in-house brick manufacturing</p> <p>d) Two nos of Fly Ash Bagging Machine have been commissioned for bagging of fly ash and transportation to end users by railway wagons.</p> <p>e) Dry fly ashes packed in bags are being sent to Darshana, Bangladesh on monthly basis. Steps are being take to increase the frequency of the rakes.</p>
<p>SO<sub>x</sub> &amp; NO<sub>x</sub> NORMS</p>	<p>a) AAQ monitoring, stack emission monitoring, Noise level monitoring and Effluent water analysis at specified frequency with reporting of data" has been outsourced to and done by M/s Pollution and Project Consultants. Since BPSCL is well within the premises of the Bokaro Steel Plant, the ambient quality is presumed to be similar to that of Bokaro Steel Plant.</p> <p>b) Bokaro Steel Plant has already installed an online AAQ monitoring and data is being shared for BPSCL also as and when required.</p> <p>c) Monitoring of dust emission, is being done on-line with real time data transfer to JSPCB and CPCB.</p>
<p>MONITORING STATUS &amp; REPORT</p>	<p>Attached as Annexures.</p>

<b>A : GENERAL INFORMATION ABOUT STACK :</b>	
1 Stack connected to : Boiler Unit # 3	
2 a) Material of construction of the Stack : R.C.C.	
b) Material of construction of the Duct : M.S.	
3 a) Shape of the stack : Circular	
b) Shape of the duct : Rectangular	
4 Height of the stack :	
a) From Ground Level (M) : 180	
b) From Roof Level (M) : --	
5 Dimension of the duct :	
a) Top (M) : --	
b) Bottom (M) : --	
c) Sampling Point (M) : 1.5 X 1.3	
6 Height of the Sampling Port :	
a) From Ground Level (M) : --	
b) From Lower Disturbing Zone (M) : --	
7 Whether Stack is provided with permanent Platform/Ladder : Yes	
<b>B : Result of Sampling</b>	
<b>C : ANALYSIS/CHARACTERISTICS OF FUEL :</b>	
1 Emission due to : Burning of Fuel	
2 Fuel used : Coal+ B.F.Gas +CO.Gas	
3 Fuel consumption : Coal: 7 (TPH), B.F.Gas: 54000 (M <sup>3</sup> /Hr), CO Gas: 8000 (M <sup>3</sup> /Hr)	
4 Calorific value (k-cal/kg) : --	
5 Sulphur content (% by wt) : --	
6 Ash content (% by wt) : --	
7 Air flow : --	
<b>D : STEAM GENERATION CAPACITY:</b>	
a) Rated : 160.0 Ton/Hr	
b) Running : --	
Load: a) Rated : --	
b) Running : --	
<b>E : Pollution control device : ESP</b>	

Sl. No.	Parameters tested	Unit	Method of Test (Reference)	Result
1	TEMPERATURE OF EMISSION	deg C	IS:11255 (Part 1):1985 RA 2014 & (Part 3) 2008	176
